

Chartlet 8: North Scotland

ANNEX B

Coastguard AIS Station Coverage (Image provided by UK MCA)

The Colours represent composite signal strength, Red being the Strongest, Blue the weakest

Please note that the plots of coverage shown are composite predictions issued by the MCA for their existing chain of fixed AIS stations and cannot be guaranteed to fully represent actual coverage

The white areas, such as the one to the north west of the Orkney Islands, indicate an area from where no AIS reception is expected
