FEDERAL ENERGY REGULATORY COMMISSION**

**ADMIRALTY INLET TIDAL
ENERGY PROJECT**

Project No. 12742-000

**STATE OF WASHINGTON, DEPARTMENT OF ECOLOGY'S
MOTION TO INTERVENE**

The State of Washington, Department of Ecology (Ecology) respectfully moves the Commission, pursuant to 18 C.F.R. §§ 385.210 and .214, for the authorization to intervene in the above-entitled matter. Ecology is filing this motion for intervention in response to the October 4, 2006, Notice of Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Protests in Project No. 12742-000. The reasons in support of Ecology's right to participate in this matter are:

1. Ecology is the agency created to administer the State of Washington's Water Management Program, including its comprehensive water quality and water rights programs, and to present the views and recommendations of the state regarding any federal license or permit relating thereto at any proceeding, negotiation, or hearing in such regard conducted by the federal government. Wash. Rev. Code 90.48.260; Wash. Rev. Code 43.21A.020; Wash. Rev. Code 43.27A.090; Wash. Rev. Code 90.03.010; Wash. Rev. Code 90.54.010; Wash. Rev. Code 90.58.010; 16 U.S.C. § 803(a); and 16 U.S.C. § 821. Ecology has the responsibility to issue the Section 401 certification under the Clean Water Act which is required for the Commission to issue a permit. *See* Wash. Rev. Code 90.48.260. Ecology also has the responsibility for issuing National Pollution Discharge Elimination System (NPDES) permits, certifying compliance with the Coastal Zone Management Act (CZMA) and enforcing the state Shoreline Management Act (SMA). Ecology also has statutory responsibilities in the matters of environmental review and coordination, pursuant to the State Environmental Policy Act (SEPA). Wash. Rev. Code 86.16.010, *et seq.*; Wash. Rev. Code

90.48.260; Wash. Rev. Code 90.48.010, *et seq.*; Wash. Rev. Code 90.58.020, *et seq.*; Wash. Rev. Code 43.21C.010, *et seq.*

2. The City of Port Townsend, Washington filed a notice of application pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)-825(r) for a project known as Admiralty Inlet Tidal Energy Project. The City of Port Townsend, Washington filed in Docket No. P-12742-000, an application for a competing preliminary permit for a proposed tidal energy project that would consist of: (1) 450 Tidal In Stream Energy Conversion (TISEC) devices consisting of; (2) rotating propeller blades ten to twenty meters in diameter; (3) integrated generators with a capacity of 50 kW; (4) anchoring systems; (5) mooring lines; and (6) interconnection transmission lines. The proposed project is estimated to have an annual generation of 146.2 gigawatt-hours per-year, which would be sold to a local utility. The project is proposed to be located in Admiralty Inlet in the northwestern portion of Puget Sound, between the Olympic Peninsula and Whidbey Island, in Jefferson, Kitsap and Island Counties, in the State of Washington, which are navigable waters within the jurisdiction of the State of Washington under the Clean Water Act.

3. The interest of Ecology as the state regulatory agency that is solely responsible for water quality, water resources, SEPA, SMA, and CZMA compliance is not adequately represented by any other party in the proceeding. It is in the public interest that the state agency responsible for compliance with these laws be heard before the Commission on matters that affect those interests involving this project. Ecology desires to monitor and stay informed about the nature of this project and to participate herein to the full extent authorized under Commission rules so it can fulfill its responsibilities under the above laws.

4. If the competing preliminary permit will authorize placement of temporary test/pilot units in the waters, such construction may result in a discharge requiring a section 401 certification under the Clean Water Act.

Therefore, good cause having been shown, Ecology respectfully requests pursuant to Commission rules that it be permitted to intervene in the above-entitled proceedings and be made a party thereto. It requests the right to have notice of and appear at any and all hearings or proceedings, to produce evidence and cross-examine witnesses, to be heard through counsel, through written and oral argument, to be served henceforth with copies of all pleadings, applications, and notices and for such other participation and relief as may be appropriate. Ecology requests that the following individuals be added to the service list to receive filings and notice on behalf of Ecology for this proceeding and consent to receiving such service electronically.
